

helps you streamline your processes, increase your margins and profitability, and build stength, agility and visibility into every link of your supply chain.

MAXIMIZE MARGINS

& GAIN NEW BUSINESS INTELLIGENCE

Comprehensive, Collaborative, Integrated Logistics Solutions

In striving to maximize their competitive strength, shippers across the nation are perpetually challenged to meet strenuous customer requirements in the most efficient and economical manner. Operating in lean environments, shippers often lack the resources and technology to maximize decision making while minimizing redundancies in day-to-day operations. Today's competitive and dynamic marketplace presents growing complexities within the supply chain and a "do more with less" approach.

Meet PMAC.

Parcel Management Auditing and Consulting (PMAC) is a non-asset based third-party logistics (3PL) provider dedicated to helping you maximize your margins and gain new insights into your supply chain. PMAC creates competitive advantages for mid-market shippers with logistics solutions and technology that optimize efficiency, save money and create end-to-end visibility. Our consultative and collaborative approach enables us to work with you and your team as partners, dedicated to your ongoing success.

END-TO-END TRANSPORTATION & LOGISTICS MANAGEMENT

Business Intelligence

Gain New Insights into Your Customers, Costs and Supply Chain Opportunities

The best decisions are supported by data. Pinpoint and resolve missed opportunities, model data for what-if scenarios and uncover new areas to change or improve your processes and profitability.

We're here to help you meet your goals and enjoy a new level of margin lift and profitability.

Consulting and Strategy Enjoy Solutions Tailored Exclusively for Your Business

Too many 3PL providers push a one-size-fits-all approach to logistics solutions. Recognizing that every client's supply chain and circumstances are different, PMAC will take the time to learn and truly understand your business. Only then can we help you manage your day-to-day challenges. We methodically follow this five-step process for developing solutions: Identify, Analyze, Shape, Implement, Manage. PMAC also offers an upfront assessment that outlines and quantifies areas of opportunity for our clients.

TMS Platform Power Your Efforts Through The Industry's Premier Technology

PMAC's transportation management system (TMS) fuels your logistics efforts with minimal or no capital investment. Our cloud-based platform enables us to offer an a la carte menu of offerings, from simple carrier selection and shipping document generation to more complex, customized and integrated solutions involving planning, order consolidation, and optimization. Access it through the web, or integrate it directly into your ERP system. PMAC's TMS includes traditional and dimensional rating capabilities to accommodate parcel, less-than-truckload, and truckload shipments.

Procurement

Are There Opportunities To Further Reduce Your Costs?

PMAC can help you optimize your transportation purchasing practices to best-in-class with: data-set analytics, carrier costing calculations, a formal RFQ process, rate negotiation and contract management, performance metrics, and more. Our portfolio of clients and aggregated freight volumes afford opportunities for you to reduce costs and capitalize on real-time changes in the marketplace before your competition.

Audit and Freight Payment Services

Do You Know What It Costs to Manually Process a Single Invoice?

Auditing and invoice processing requires time and attention to detail. PMAC eliminates the burdens of invoice entry, rate audit, and carrier payment. In addition, PMAC's consolidated freight invoicing and cost center allocation automates these functions to further free up your precious time and resources.
